EXPERIENCE

Mediamatic Studio

Dec. 2025 – Apr. 2026

Full Stack Developer

Coimbatore

- Developed full-stack applications using React, Django, and MySQL.
- Built scalable REST APIs and optimized database queries for performance.
- Designed responsive UI components and deployed applications on cPanel.

Technospice

May 2025 – Nov. 2025

Junior Backend Developer Intern

Coimbatore

- Worked on **eMed Hub**, a hospital management system for patient records and appointments.
- Developed Django REST APIs, ensured secure CRUD operations, and optimized MySQL queries.
- Integrated backend with React and resolved production issues to improve performance.

PROJECTS

CRM System

- Developed a Customer Relationship Management (CRM) system to manage client details and interactions.
- Implemented modules for customer data management, activity tracking, and reporting.
- Built REST APIs using Django and integrated them with React frontend components for seamless functionality.

Assessment Portal

- Developed an online assessment platform using React, Django, and MySQL for conducting tests and evaluations.
- Implemented features such as user authentication, question management, test submission, and result generation.
- Designed and built REST APIs for exam data handling and integrated them with the React frontend for seamless interaction.

Call Monitoring System (Manually Entered Data)

- Developed a system to monitor and manage call records with manually entered data.
- Implemented forms to capture call details, agent information, and performance tracking.
- Stored and managed call data efficiently using MySQL with Django backend APIs.
